Sort it Out

Classification: Grouping by behaviours

Look closely at the animals in the **Pania Reef Tank**.
Find some **animals** that display the **behaviour** below.

Behaviour	Animal (Draw or write)
Swim alone	
Swim in schools	
Hide amongst the rocks	
Are bottom dwellers	
Other behaviours	
Behavioural classification is an important tool for scientists. Can you suggest why?	
Why is behavioural classification not enough to correctly identify a species?
