

Dinosaur Discovery

Have a good look around the exhibition first before you answer the following questions. All the information you need is on the walls.

1. What is a dinosaur?
2. How do we know about dinosaurs?
3. How are fossils made?
4. Find the fossil site on the Hawke's Bay Wall map. As you can see, it is many kilometres from the sea. Why are so many marine fossils found there?
5. Who discovered these Hawke's Bay fossils?
6. What is the name of the large land mass which New Zealand was once part of?
7. Name two marine reptiles once found in Hawke's Bay coastal waters.
8. What was the general name for flying reptiles?
